

// 01 · PROFILE

Game design student at Hochschule Furtwangen (Games and Immersive Media, 4th semester) with a focus on systems design and game feel. I design from the feeling outward. Systems, sound and space that reinforce each other, tested early through paper prototypes and playtests. Hands on in Godot (C#/GDScript), from solo prototypes to a lead design role in a four person team. **Currently looking for an internship.**

// 02 · SELECTED PROJECTS

01 Home Tweet Home

Godot

3rd sem · 6 wks

Lead Designer, Sound Design, supporting implementation · 4-person student team

- › Designed a dual core loop that flips a cozy life sim into physics-based action, with one shared economy across both loops.
- › Translated furniture weight classes into physics parameters (mass, damping, knockback): light objects are fast and risky, heavy ones slow but hit as area weapons.
- › Ran six paper-prototype tests. The findings reshaped the narrator and the rebellion mechanic.
- › Wrote the game design document and added a late sound pass for currency and hit feedback.

02 SeaTeam

Tabletop

2nd sem · 6 wks

Mechanics & Rules Design, glasses materials, team organization · 4-person team · analog tabletop game

- › Designed an asymmetric co-op game: color-filter glasses split what each player sees, so communication becomes the gameplay.
- › Helped steer the project through several concept pivots to a secret dice-placement design.
- › Ran two structured playtests; added a beacon mechanic players asked for and an oxygen drain as a global timer after testing showed the game was too easy.
- › Rewrote the rulebook down to about 2.5 pages and produced the glasses materials for the boxed final prototype.

03 Blizz

Godot

2nd sem · 1 wk

Game Design, Sound Design, Implementation · solo · playable on itch.io

- › Built a complete, playable loop alone in one week: a cat-and-mouse game in whiteout, navigated by sound only.
- › Recorded or produced about 95% of the audio; a dissonance filter grows stronger as the enemy gets closer.

// 03 · EXPERIENCE

04/2023 – 02/2025 **Saunameister** · Stadtwerke Neuss

06/2020 – 01/2023 **Krav Maga Trainer** · Schule für Selbstverteidigung UG: trained children and teenagers in Krav Maga

// 04 · SKILLS

DESIGN

Systems and economy design, core loop design, game feel, asymmetric co-op design

PROCESS

Rapid prototyping, paper and physical prototyping, playtesting and iteration, game design documents and rulebooks, design lead and team moderation

SOUND

Sound design (self-recorded and self-produced), sound as a mechanic, audio-driven game feel

ENGINES & CODE

Godot 4, C#, JavaScript, TypeScript, HTML/CSS, WebGL/OpenGL

3D, AUDIO & OTHER

Blender, Krita, FMOD, Ableton Live, Microsoft Office, Google Docs, Miro

// 05 · EDUCATION

03/2025 – present

Hochschule Furtwangen

Games and Immersive Media (B.A.), 4th semester, expected graduation 2028

10/2023 – 09/2024

Heinrich-Heine-Universität

Bachelor's programme Philosophy, 2 semesters

2013 – 2022

Michael-Ende-Gymnasium,

Tönisvorst

Allgemeine Hochschulreife (Abitur)
